The Periodontium: Alveolar Process, Cementum, Periodontal Ligament, And The Gingiva

Synopsis

This book discusses the supporting elements of the tooth detailing its four components: cementum, alveolus, periodontal ligament, and the gingiva. Prior to detailing the components of the periodontium, the three tissue types that compose the periodontium, namely epithelium, connective tissue, and bone, are reviewed. Those aspects of epithelium and connective tissue that pertain to the periodontium are emphasized, whereas those aspects that have merely a cursory relevance to the periodontium, as for example adipose tissue, are mentioned only briefly. This short but concise book is lavishly illustrated with many photomicrographs that were taken especially for this textbook. The author, Dr. Leslie P. Gartner, is a world-renowned anatomist whose books have been translated into eleven languages and are used in medical and dental schools throughout the world.

Book Information

File Size: 3107 KB

Print Length: 117 pages

Publisher: Jen House Publishing Company (August 8, 2012)

Publication Date: August 8, 2012

Sold by: Digital Services LLC

Language: English

ASIN: B008VHHJRG
